US Bureau of Land Management
Western Oregon Plan Revision Office
Portland, Oregon 77208

Gentlemen:

I recently learned of your revision to your logging plan that would authorize an increase in the cutting of 200 year old trees by 700%.

You have to know that this is outrageous and totally ridiculous.

I know you have to obey your "boss", George W. Bush and his cronies or you get fired but this is another one of those plans that will be stopped dead as soon as he leaves office and sane people are voted in. Mr. Bush and company are again catering to big business and totally ignoring the voice of the American People.

Look to the future; if you implement this plan, you will go out with the Bush Administration. If you present a much more reasonable plan than maybe you can keep your jobs thru the new administration.

I may live in Florida but I am an American citizen and the land that you manage is mine, too!

Sincerely,

Alfred T. Brayton
